

FRUIT NINJA™

ACADEMY

Math Master

WHAT IS FRUIT NINJA ACADEMY: MATH MASTER?

This is an educational app designed to teach **Grade 1 level math skills** to children aged 5 to 7 years old.

The app includes a collection of fun games that revolve around solving a sequence of math problems and is set in the beloved and colorful world of Fruit Ninja.

The game is the perfect companion to your child's school learning and allows them to practice simple math concepts in an engaging way. It is available on both Apple and Android touch tablets and phones.

HOW DOES THE APP IMPROVE MATH SKILLS?

The app covers the Grade 1 math curriculum and is split into the following areas:

1 ADDITION & SUBTRACTION

Players must solve a sequence of addition or subtraction equations by picking the correct number of bananas and feeding them to the monkey statue.

Addition game covers numbers **0 to 9**, with a maximum **sum of 18**.

Subtraction game covers numbers **0 to 9**, with all answers **less than 10**.

3 NUMBERS & SEQUENCES

Teaches number recognition, comparisons (odd/even, greater/less-than) and sequences.

Players are asked questions and must roll watermelons marked with the correct answer - or in the correct order - into a lion's mouth.

The highest number used in this game is **50**.

2 MULTIPLICATION (SKIP COUNTING)

Players must fill in the blanks of multiplication equations using the skip counting method.

Add the correct number of boxes containing a quantity of fruit to complete the equation. Juice the fruit to check your answer.

This game covers skips of **2, 3 and 5**, to a maximum answer of **25**.

4 SHAPES & FRACTIONS

Players learn to recognise shapes by slicing the correct shapes with their finger.

Shape recognition for square, triangle, circle, oval, diamond, hexagon and trapezoids.

Fractions for wholes, thirds, halves and quarters.

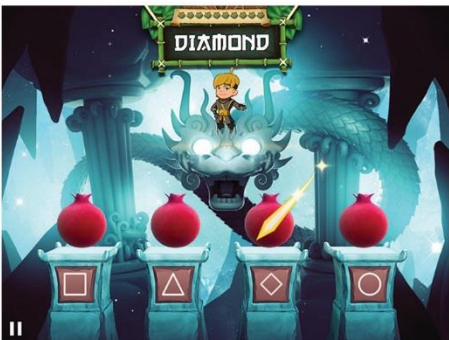

FEATURES FOR PARENTS & EDUCATORS

Fruit Ninja Academy: Math Master measures the player's success and failure through each game, and presents these stats as easy-to-read graphs for parents to see how their child is progressing.

The player can also test what they have learned in the Testing Dojo - a classic game of Fruit Ninja that incorporates the math challenges taught in the other game modes.
